

Pharma Solutions

Best fit solutions support your sustainability goals

Let's work together to make our world a better place

We know and value the immense amount of work done in pharma laboratories around the world, which is why we offer a wide product and service portfolio that enables concentrated, relaxed work tailored to your specific needs.

Whether it's mAb drug discovery or vaccine research, we help you to find the solutions you need to get a stay ahead in the market.

mAb Discovery: From hit to lead candidate

Monoclonal antibodies (mAb) have become increasingly popular within the biopharmaceutical market. Today, their production is more sought-after than ever. Our comprehensive list of mAb equipment streamlines workflows while reducing procedural steps and costs.

No matter if it's providing optimal centrifugation for fast, reliable results, ultra-low freezers for cold storage, high-performance shakers or bioreactors to optimize cell growth and antibody production, our portfolio keeps efficient mAb production on track.

Facilitate Compliance Processes

The pharmaceutical laboratory is subject to many regulations. Our solutions support you in documentation, quality management and monitoring of devices and conditions.

Centrifuge Versatility Solution

- > GxP documentation support for antigen concentration, hybridoma, PBMC isolation or FACS
- > User management
- > Run records

Catalog # 05-414-460

Centrifuge 5910 Ri

Included accessories:

- > Rotor S-4x universal with buckets
- > 4 x 5/15/plate adapter
- > 4 x 50/250/plate adapter

Gain Speed and Efficiency

Maximum efficiency at every step paves the way for a timely market launch. Eppendorf's solutions are designed to streamline and accelerate your mAb workflow and establish scalable processes.

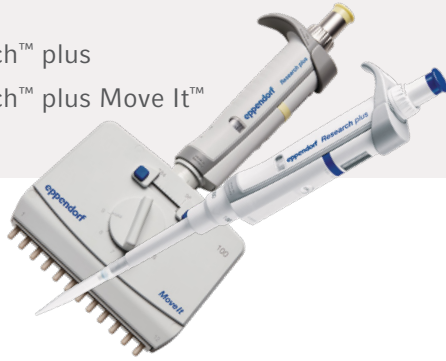

Pipetting Recommended Set

Molecular biology methods

- > Save up to 70% of time with adjustable tip spacing
- > Change formats fast & easily
- > Increase throughput with electronic pipettes

Basic Solution

- > Eppendorf Research™ plus
- > Eppendorf Research™ plus Move It™

Advanced Solution

- > Eppendorf Xplorer™ plus
- > Eppendorf Xplorer™ plus Move It™

Incubator Shaker Recommended Configuration

For high-throughput screening assays

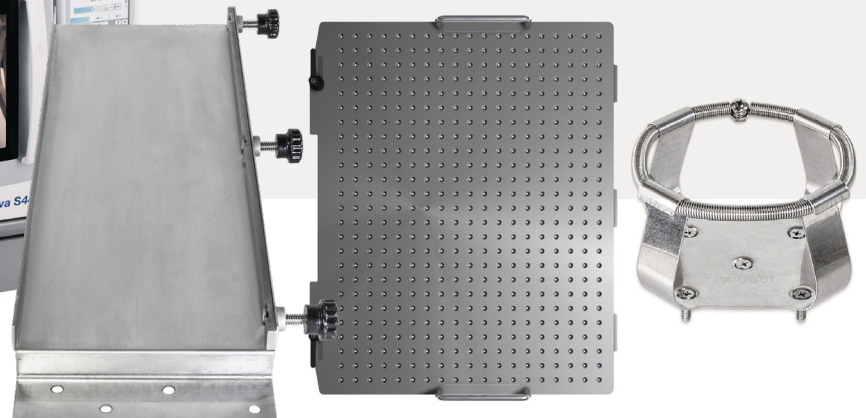

- > Screen up to 81 x 125 mL flasks in parallel
- > High liquid load
- > Reliable performance 24/7

Catalog # 05-400-165

Innova™ S44i (refrigerated, 25mm orbit)

Recommended accessories:

- > Universal platform
- > Microplate holder
- > Clamps: 3 x 125 mL, 3 x 250 mL, 3 x 500 mL, 3 x 1 L

Improve Reproducibility and Sample Safety

Reliable quality is fundamental, as repetition is sometimes not an option. Our solutions and services help you to rely on the safety and integrity of your samples, on the performance of your devices and on the accuracy of your results.

Centrifugation Big Volume Harvesting Solution

For large-scale expression in cell lines or bacteria

- > Accurate cooling for cell integrity
- > Cross-contamination prevention
- > Reproducible operation

Catalog # 05-414-458

Centrifuge 5910 Ri

Included accessories:

- > Rotor S-4x Universal with buckets
- > 4 x 1L adapter
- > 4 x 1L bottle

Incubator Shaker Recommended Configuration

For hybridoma, expression of antibodies and cell line establishment

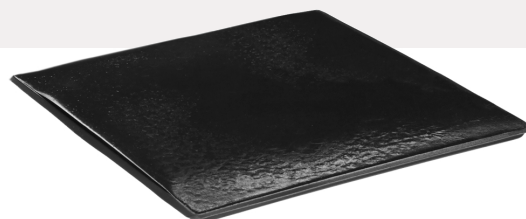

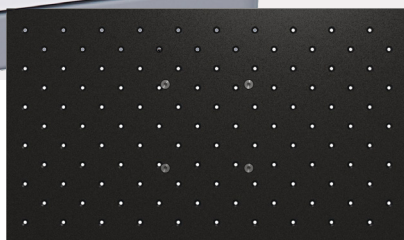

- > Reliable conditions: Tight specifications, light protection for media
- > Rapid decontamination and high temperature disinfection

Catalog # 14-380-016

New Brunswick™ S41i CO2 incubator shaker

Recommended accessories:

- > Universal platform
- > Sticky pad

Success Built on Understanding

Efficiency is just as vital to pharmaceutical research as innovation. To get your drug to market faster, you need streamlined processes that reduce downtime and ease compliance issues. Results must be reliable and repeatable for safe outcomes.

That's why you need a partner who not only provides efficient, high-quality products but also deeply understands the many requirements and challenges in bringing a drug's successful development full circle.

After all, success is not just built on product quality but also on expert consultation, compliance assistance, new sustainability methods and the march towards even more digital solutions.

- > Seamless workflow
- > Highest efficiency
- > Reliable quality
- > Peace of mind
