

Water at the Center of Your Science

Essentials That Keep Critical Workflows in Motion

Access over **200** water types and **4,500** water testing and environmental analysis products from nearly **6,500** suppliers.

Visit fishersci.com/environmental-testing or fishersci.ca/environmental-testing to learn more.

Innovative Lab Solutions for Your Most Pressing Concerns

- Sample and testing integrity
- Increased efficiency and productivity
- Precision and accuracy

The electrochemistry market, from buffers to electrodes, will potentially reach **\$428 million** by **2025** in North America.¹

By **2025**, the water purification market is expected to be worth

\$222 million²

By **2025**, global environmental testing is expected to reach

\$12.1 billion³

The environmental testing market is expected to grow at a CAGR of **8.7%** from **2020** to **2025**.⁴

High Confidence, Accurate Results

Water content can affect your product. Perform Karl Fischer titrations (KFT) for quick and accurate water determination. To get started, explore the Honeywell Hydranal™ portfolio of easy-to-use, pyridine-free reagents and reliable standards.

Speedy Titrations

Honeywell Hydranal Reagents

- Long shelf life, accurate results, and stable endpoints
- Wide range of applications
- World-leading technical support

Convenient and Flexible

Honeywell Hydranal One-Component Reagents

- Long shelf life and an unlimited water capacity
- Suitable for methanol-reacting compounds (ketones and aldehydes)
- Frequently used as a pyridine-free Karl Fischer reagent

Accelerate Your Process

Honeywell Hydranal Methanol Rapid Medium

- Shorter titration times and rapid endpoints
- Helps enable an optimal Karl Fischer titration
- Highly accurate analyses

A Range of Applications

Honeywell Hydranal Water Standards

- Long shelf life, convenient packaging, and detailed instructions
- Include exact water content for titer determination, precision, and accuracy
- Manufactured according to current ISO requirements and tested against NIST SRM 2890
